

QR wirestrap™

quick-release bundling solution

Quick-release Wirestrap™ is a flexible, self-adhesive fastener designed to simplify and accelerate bundling applications. QR Wirestrap™ provides a number of advantages over roll-stock tapes, cable-ties, and other commonly used bundling products by eliminating the need for tools or preparation.

QR Wirestrap's™ greatest advantage lies in its versatile, customizable design. It can be supplied in a variety of sizes, and configurations. A range of available fastening materials enable QR Wirestrap™ to perform in a number of automotive applications.

U.S. Patent/s: 5,827,589, 6,698,068, 6,631,335.

Primary Applications

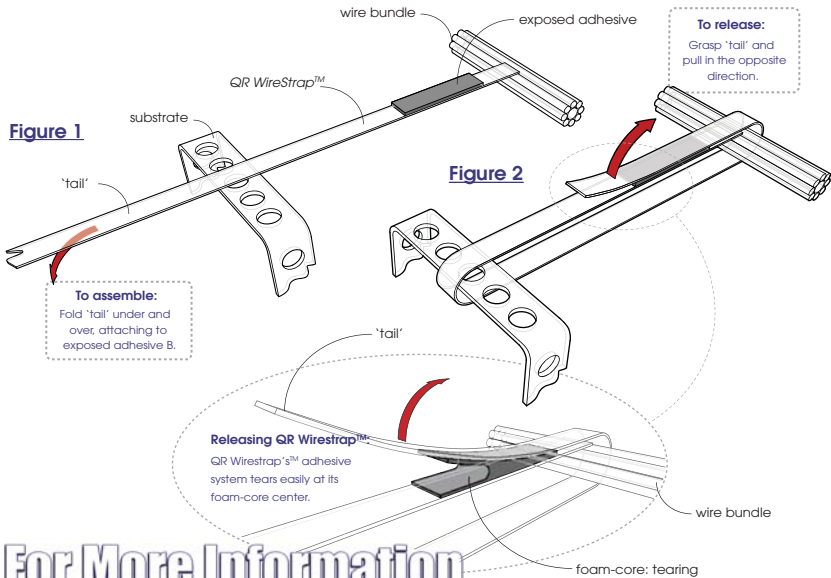

- Secure a variety of bundled components in nearly any transport application
- Reduce packaging material: *costs, assembly, and disassembly time*
- Prevent damage caused by over-tightening and cutting tools
- Use in environments where packaging materials are re-used

How it works

Quick-release Wirestrap™ is designed for use in temporary bundling applications without the need for tools or preparation.

Using QR Wirestrap™ couldn't be simpler. Just remove the release liner to reveal the self-adhesive material, and place in the desired location. When adhered to itself in a closed loop around your components (figure 2), QR Wirestrap™ performs with high tensile strength comparable to other fastening products. Disassembly is even faster. Simply grasp QR Wirestrap's™ 'tail' and pull apart to release; the adhesive system will release with minimal effort under peel conditions.
